

# NRGkick Connect

## Plug into the future

### Solar led charging

Which electric car driver does not dream of charging his electric car with solar energy? In combination with the Bluetooth enabled versions of the NRGkick charging unit, NRGkick Connect now enables photovoltaic-led charging. Three easily adjustable and time efficient charging strategies ensure that you can use your solar energy exactly the way you want it!

### Access via NRGkick Cloud

Access your NRGkick from anywhere via the Internet and NRGkick Cloud. Stay up-to-date at anytime, anywhere, change charging settings, and much more!

### Monthly charging reports

At a glance you can see immediately how many kilowatt hours you have charged in the past month and you also know exactly the share of renewable energy from the total amount of energy charged!

### Automatic reporting

You do not have to create the monthly reports yourself - just have them sent to you automatically and comfortably at the beginning of each month instead!

### Time controlled charging

Simply enter the time span for your NRGkick to charge your car and NRGkick Connect will do the rest for you!

### Made in Austria

NRGkick Connect is developed and manufactured in Styria.

### Recordings and statistics

NRGkick Connect does not miss a thing - via NRGkick Cloud you can find out anytime, anywhere the amount of energy you've been charging, CO<sub>2</sub> savings, electricity costs and more.

### Alexa voice control

Control your NRGkick with voice commands! No matter if you want to start or stop the charging process or if you want to find out about the amount of energy you have charged: NRGkick Connect can be integrated into speech assistants such as "Alexa", additional assistants will follow!

### WiFi + Bluetooth

On the one hand, NRGkick Connect can connect to your NRGkick via Bluetooth and on the other hand, it can connect directly with your WiFi network at home. This makes it possible to expand the range of functions enormously and to integrate further Smart Features.

### Interfaces

Through the Web-API you can connect your own applications and also all other manufacturers can integrate NRGkick Connect and its functionalities! The integration of additional interfaces such as OCPP, EEBUS, ... will be carried out soon.

### Coming soon

NRGkick Connect is constantly being developed further so we can offer you more exciting Smart Features in the future.
